GitHub | Portfolio | LinkedIn

Summary

Motivated and adaptable Software Developer with a BSc in IT Software Engineering, specializing in full-stack web development. Skilled in .NET, C#, PHP, Kotlin, and JavaScript, with hands-on experience from academic and personal projects. Passionate about building intuitive, scalable solutions and eager to contribute to real-world development teams. Committed to continuous growth, actively enhancing skills through online certifications and staying up-to-date with the latest industry trends.

Education

BSc Information Technology, Eduvos | South Africa (2024)

Major: Software Engineering

Experience

Cyber Security Intern | Hackify Cyber Security – 2 months

- Participated in the Hackify Cyber Security Internship, where I gained hands-on experience in identifying and mitigating web vulnerabilities.
- Utilized industry-standard tools such as Burp Suite and SQLmap to perform penetration testing and assess website security.

Intern Operations Manager | Aqquas Catering – 2 years

- Assisted in managing daily operations to ensure smooth service delivery and customer satisfaction.
- Coordinated staff schedules, monitored inventory levels, and supported procurement processes to maintain optimal stock for catering events.
- Contributed to streamlining workflow processes and improving operational efficiency through hands-on involvement in logistics and event planning.
- Supported budgeting and cost-control efforts, helping reduce waste and improve profitability.

Certifications

50 Projects in 50 Days - HTML, CSS & JavaScript - Udemy

Cybersecurity & Penetration Testing Internship - Hactify

ChatGPT Python Programming: AI Guided Code Mastery – Udemy

Introduction to C# - Sololearn

C# Intermediate – Sololearn

Product Design Job Simulation - Accenture North America

Introduction to Software Engineering Job Simulation - Commonwealth Bank

- C#
- PHP
- Kotlin
- HTML
- CSS

- JavaScript
- Agile methodologies
- SQL
- Canva
- Figma

- Bootstrap
- MVC
- Razor Pages
- GitHub
- Git

Projects

Freelancer | Online Mart

- Built a full-stack e-commerce platform using ASP.NET Core MVC, SQL Server, and Bootstrap, featuring a clean UI and robust role-based access control (Admin & Customer).

- Integrated Stripe API for secure online payments and implemented async programming for a responsive user experience.

- Developed key features including session-based shopping cart, customized ASP.NET Identity, and admin dashboard for managing users, products, and categories.

Freelancer | Aquas Catering

- Developed and launched a responsive website using PHP, CSS, HTML, and JavaScript.

- Implemented Google Analytics to track website traffic and user behavior.

- Deployed the website on a free hosting platform for a cost-effective solution.

Freelancer | Sneaker City

- Sneaker City is a C# MVC e-commerce web app for sneaker enthusiasts.

- Users can browse sneakers, create accounts, add items to their cart or wishlist, and place orders securely.

- Integrated Stripe API for secure online transactions.

- Developed user authorization with role-based access control Designed an appealing and responsive UI using Razor Pages and Bootstrap.

Freelancer | Hangman Game

- I developed a Hangman game using WinForms, where players guess words while tracking their score, history, wins, and losses.

- The game offers an interactive experience, challenging users to complete the word before running out of attempts.
